

WASHINGTON MONUMENT

How to build the paper model featured in the book *American Landmarks: Miniature Models to Cut and Assemble* by Matt Bergstrom (©2012 Dover Publications, Inc.)

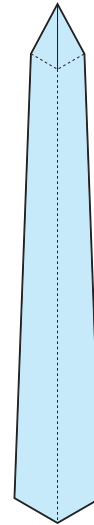

1

Cut out the tower piece. Score the dotted lines and fold the tower carefully. Make sure the folds are straight and even. Glue the tab on the long side of the tower inside.

Fold the triangular tabs of the top of the tower inward. Use a tweezer to create a sharp point in the folds at the top of the tower.

Fold the sides of the top together and glue them in place.

Now your paper model of the Washington Monument is finished!
